This product is product takes approximately **20 MINUTES** TO assemble with **2 PEOPLE**.

The fittings pack contains **SMALL ITEMS** which should be **KEPT AWAY FROM YOUNG CHILDREN**.

Fittings and parts checklist

1	Headboard x 1	A	Firm Fix Assembly Nut x 8	
2	Footboard x 1	B	Threads (M8*67) x 8	
3	L/H Side Rail x 1	C	Spanner (M13) x 1	
4	R/H Side Rail x 1	D	Ends for slats x 72	
5	Centre Rail x 1	E	Wooden Dowels (10*35 mm)x 8	
6	Bed Slats x 36			

Step by step assembly instructions

1. Threaded rods to be screwed by hand to headboard and footboard before moving to step 2

2. 4x wooden dowels to be attached to the each side rail by using a rubber mallet as shown.

3. Locate the LH / RH side rails onto threaded rods protruding from the headboard as shown.

4. In order to assist in easily winding the nut on to the bolt, please put the nut in place - see sketch - and lightly press it against the bolt using one of your fingers as shown in the sketch. With your other, free hand start turning the nut clockwise, using the spanner supplied with the fittings. As soon as the nut is fully wound on to the bolt, remove your finger but continue winding the nut with the spanner until it is tight. Repeat same assembly operation for footboard.

5. Locate the centre cross rail into the brackets

6. Push fit two plastic caps onto either end of the slat. Push fit the slat into the pre-drilled pilot holes. Please note that it may require a light tap with a rubber mallet to secure the plastic end caps into the holes. Repeat this step with the other 35 slats.

7. The assembly is now complete

Care and Maintenance

Wood Furniture

Wood displays different grain patterns depending on which way it is cut - for example, the 'medullary ray' which can appear on oak furniture is a mark of good quality timber - these are just characteristics of the natural beauty of wood. Some furniture is also deliberately aged and rustic.

All timber surfaces will change colour and mellow over time. New furniture will initially vary in shade from items that have been previously purchased.

How to care for your wood furniture

Furniture with a hard lacquer, wax polish or painted surface should be dusted with a dry cloth. When using the surface for serving food and drinks it is best to use protective mats and coasters. Spillages should be wiped up as soon as possible.

Spray polishes are best avoided as they contain silicones which may spoil the furniture's surface by building up over time. Use of cleaning materials containing abrasive compounds, acidic or caustic reagents and any bleaches containing oxidising reagents should be avoided as prolonged use may damage the lacquer surface. Wipe up spills immediately. If sticky marks occur on the surface they can be removed with a dilute solution of warm soapy water. The offending area should be rubbed lightly and then completely dried immediately afterwards, before replacing any mats etc.

Our furniture will endure most temperatures in the home but it is best to avoid placing furniture next to heat sources such as radiators or fires. Be particularly careful with solid wood as the lack of humidity caused by central heating can cause damage such as warping.

Safety Instructions

Never drag furniture when moving it, always lift it. Please take care when handling or moving the furniture as careless handling may cause damage or injury. No liability will be accepted for damage or injury caused by incorrectly installed furniture.
