# Frequently Asked Questions

## **Can I use a heated blanket?**

We would not recommend using an electric blanket with a TEMPUR® mattress as the mattress works best with your natural body heat, so you may not feel the optimum support if an electric blanket is used. However, if you would still prefer to use an electric blanket, we would suggest an over blanket rather than an under blanket. An over blanket will be perfectly safe to use and will not damage the mattress..

## **Do they make you hot?**

TEMPUR® mattresses have breathable material inside (open cell technology) that allows heat to dissipate and allows cool air into the mattress.

## **Can you wash the mattress/pillow covers?**

All the covers on TEMPUR® mattresses have removable, washable covers at 60 degrees.

## **What is the weight limit on a TEMPUR® mattress and the adjustable bed base?**

All TEMPUR® mattresses have a suggested limit of 23st per side, which means you can have different weight people sleeping on the same bed and both will receive the perfect support and pressure relief. The adjustable bed base has the same weight limit as a TEMPUR® mattress.

## **Do you need to rotate a TEMPUR® mattress?**

TEMPUR® mattresses are maintenance free which means you never need to rotate or flip the mattress throughout its life.
