METAL CLIP TASK LAMP USER GUIDE

| , | |
|---|--|
| This is a Class II product and must NOT be earthed. Please read these instructions carefully before commencing any work. This product is designed to be clipped on to a secure surface and connected to a mains power outlet via the supplied 3-pin plug. Do not remove the plug and connect by other means. Do not clip onto cylindrical/tubular objects. Please ensure that the surface is suitable to clip the light on securely and without damaging the surface. The clip part of this product is designed with safety in mind. It may be a little stiff in order to provide enough grip to bear the weight of the product. DO NOT switch the light on until you have made sure it is clipped on securely and will not move. | |

| Light fitting | | × 1 |
| Bulb tool | Co- | x 1 |

Product assembly

Step 1

Carefully unpack the carton, making sure all the parts are present before assembly.

Step 2

Using the supplied bulb tool (A), fit the recommended bulb (B) as per the details overleaf.

Step 3

Attach the lamp to the required surface (such as a desk or table) by squeezing together the ends of the metal clip (C).

NOTE: The metal clip will open to a maximum of 2cm only.

Step 4

Plug into the mains. Your task lamp is now ready for use.

NOTE: The neck of the lamp (D) is

flexible and can be bent to the appropriate angle as needed.
