

Product information

- Outdoor use only
- Non-dimmable
- Replacement bulbs should be the same type and rating, available from John Lewis Partners or other established brands
- Clean the fitting with a soft damp cloth. Do not use abrasive chemical cleaners as this will damage the finish
- Glass parts - Remove and wash in warm water or use a damp cloth. Do not use abrasive materials as these will damage the finish. Take care when handling glass parts to avoid damage or injury
- Do not use this product if the shade is cracked or damaged.
Do not use the product without the shade attached

Aftercare and Troubleshooting

You've switched on the light, but it's not working:

1. Check your power supply is switched on
2. Turn off the light and check that the bulb is inserted correctly
3. Check the bulb is still in working order

If there are technical issues with this product that you can't solve, please contact your nearest John Lewis & Partners shop or call Technical Support on 03301 230106.

Getting started

Thank you for purchasing this John Lewis & Partners product. For your safety, and to make sure everything is working properly, please read the instructions carefully before use.

Warnings

This is a Class 1 product and must be earthed. Please read these instructions carefully before commencing any work. It is recommended that this fitting is installed by a qualified electrician. Install in accordance with the IEE Wiring regulations and the Building Regulations. To prevent electric shock switch off at mains supply before installing or maintaining this fitting. Ensure other persons cannot restore the electrical supply without your knowledge. If you are in any doubt, please consult a qualified electrician. This light fitting should be connected to a 5 amp fused circuit. If replacing an existing fitting, make a note of the connections. This product is rated IP44 and is suitable for outdoor use. This product is suitable for installation on surfaces with normal flammability e.g. wood, plasterboard, masonry. It is not suitable for use on highly flammable surfaces (e.g. polystyrene, textiles). For your safety, always switch off the supply before changing lightbulbs, cleaning or removing shades. Always take care when handling lightbulbs to avoid injury in case of breakage.

Parts list

| Description | Image | Quantity |
|---------------|---|----------|
| Light fitting |  | x 1 |
| Bulbs |  | x 2 |
| Wall plugs |  | x 2 |
| Screws |  | x 2 |

Product assembly

Step 1

Carefully unpack the carton, making sure all the parts are present before assembly. Before removing the existing fitting, carefully note the position of each set of wires.

Step 2

The installation of this fitting will be much easier with the help of an assistant. Remove the screws (A) from the side of the product and lift the light fitting body away from the wall back. Keep the screws in a safe place for use later.

Step 3

Using the wall back as a template, mark the position of the mounting holes. Drill holes and fit supplied wall plugs (B). Take care not to damage any wiring or pipes when drilling the holes. Feed the incoming mains supply cable through the grommet entry hole (C). Fix the wall back to the wall using the supplied screws (D). Ensure the wall is capable of holding the weight of the product.

Step 4

Having identified the household wiring from your existing light fitting, connect to the connection block (E) inside the product in the following way:

Check that: You have correctly identified the house wires. The connections are tight. No loose strands have been left out of the connection block and the exposed ends of the wires are completely enclosed inside the connection block. Ensure the grommet is in place to maintain IP rating.

Step 5

Place the light fitting over the threads of the securing screws (A) and refit the screws to secure. Make sure the fitting is correctly oriented in a vertical direction.

Step 6

To fit the bulbs (F). Firstly unscrew the lampholder covers (G), then insert the new bulbs before refitting the covers. Make sure the seal is tight between the threads of the lampholder covers and the light fitting body to ensure effective ingress protection.

Step 7

Replace fuse or circuit breaker and switch on. Your light is now ready for use.
