Helpful advice before you begin

1. We suggest you spend a short time reading through this leaflet and then follow the simple step by step instructions.
2. Do not discard any of the packaging until you have checked that you have all the parts and the pack of fittings.
3. Assemble this product on a soft surface.
4. We recommend a periodic check on all fixing points to make sure they remain fully tightened.
5. Keep out of reach of small children. It contains small parts which might present a choking hazard.
6. Do not use any other tools other than those recommended to build this product.

GUIDE TO WALL MOUNTING & FIXINGS

KEY INFORMATION

Warning: Although we have provided fixings, different wall materials require different types of screws / fixings. Please ensure you use the correct screws / fixings for your type of walls and seek professional advice if you are not sure. Failure of the product due to incorrect fixings is the responsibility of the installer.

Important - When drilling into the walls always check that there are no hidden wires or pipes etc.

Take care when drilling on glazed tile surfaces in case the drill slips.

FIXINGS

You can use one of the following types of wall plug if your walls are made of brick, breezeblock, concrete, stone or wood.

General Purpose wall plug

Generally aerated blocks should not be used to support heavy loads, use a specialist fitting in this case. For light loads, general – purpose wall plugs can be used.

Plasterboard wall plug

For use when attaching light loads on to plasterboard partitions.

Cavity Fixing wall plug

For use with plasterboard partitions or hollow wooden doors.

Cavity Fixing – Heavy Duty wall plug

For use when fitting or supporting heavy loads such as shelving, wall cabinets and coat racks.

Hammer Fixing wall plug

For use with walls stuck with plasterboard. The hammer fixing allows it to be fixed to the wall rather than the plasterboard. Always check the fixing is secure to the retaining wall.

Shield Anchor wall plug – Heavy loads

For use with heavier loads such as TV and Hi-Fi speakers and satellite dishes etc.
