

# ION8

## How To Use

### One Handed

All OneTouch ION8 bottles have a flip-top lid that **opens one-handed** with one simple click.

### Smooth Liquid Flow

Included in each of the bottles is an **air vent** which allows for smooth and spill free liquid flow for rapid hydration.

### Drink In Comfort

The side positioned spout means you can **drink in comfort** with no extreme tilt or neck strain.

Our new Ion8 OneTouch 2.0 **full flip lid** folds back a full 240° for a safe and clear line of sight meaning you can drink and still see ahead.

### Small Tilt

You can enjoy smooth liquid flow from your Ion8 bottle **right to the end** with a small degree of tilt.

### Never Over Tilt

Over tilting can cause water to escape through the air vent and will cause spillage and reduce smooth liquid flow.

### Leakproof

When not in use ION8 bottles are 100% leakproof with triple lock security for peace of mind on-the-go.
