

One handed

All OneTouch ION8 bottles have a flip-top lid that opens one-handed with one simple click.

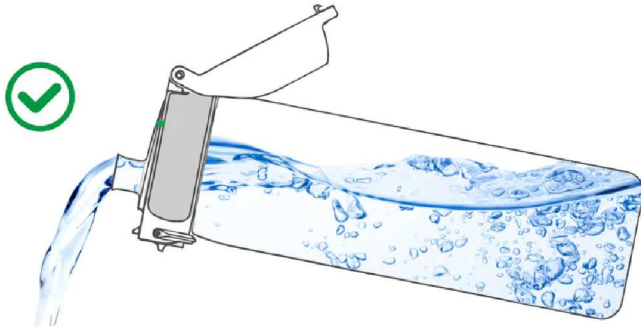

Leakproof

When not in use ION8 bottles are 100% leakproof with triple lock security for peace of mind on-the-go.

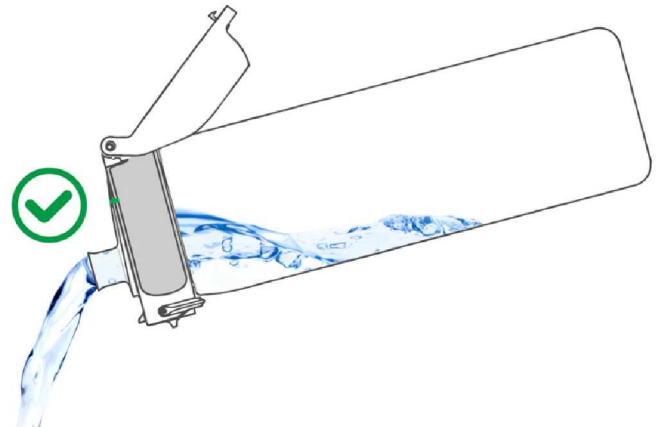

Smooth Liquid Flow

Included in each of the bottles is an air vent which allows for smooth and spill free liquid flow for rapid hydration.

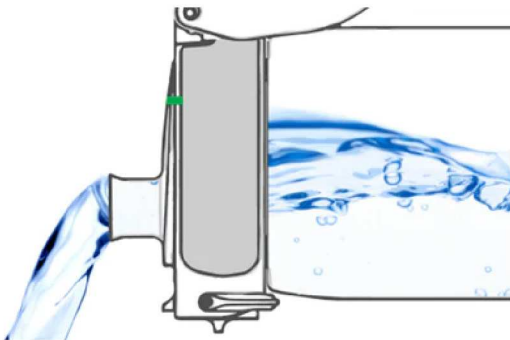

Small Tilt

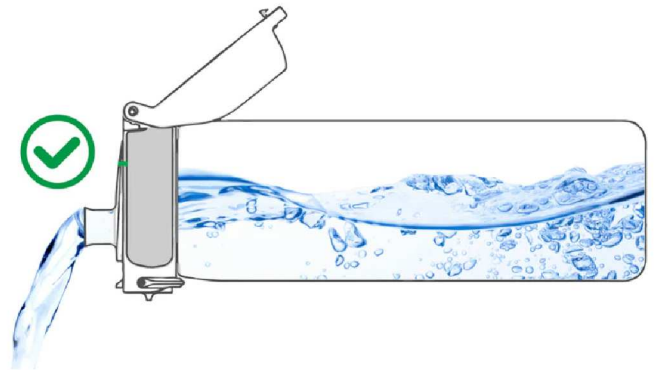

Drink in Comfort

The side positioned spout means you can drink in comfort with no extreme tilt or neck strain.

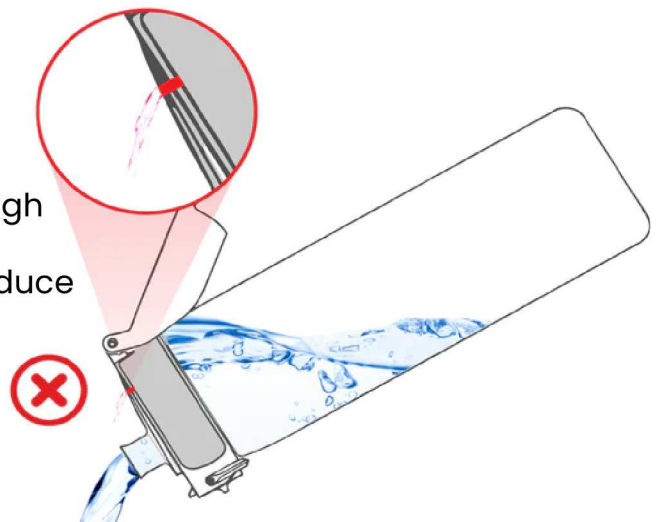

Clear Line of Sight

Our new Ion8 OneTouch 2.0 full flip lid folds back a full 240° for a safe and clear line of sight meaning you can drink and still see.

Never Over Tilt

Over tilting can cause water to escape through the air vent and will cause spillage and reduce smooth liquid flow.
