

## Product information

- Indoor use only
- Non-dimmable
- Replacement bulbs should be the same type and rating, available from John Lewis Partners or other established brands
- Clean the fitting with a soft dry cloth. Do not use abrasive chemical cleaners as this will damage the finish
- Suitable for use with shades no heavier than 0.65kg and 45cm or smaller.
- **Warning!** Not suitable for heavy or fragile shades.

## Aftercare and Troubleshooting

### You've switched on the light, but it's not working:

1. Check your power supply is switched on
2. Turn off the light and check that the bulb is inserted correctly
3. Check the bulb is still in working order

If there are technical issues with this product that you can't solve, please contact your nearest John Lewis & Partners shop or call Technical Support on 03301 230106.

# METAL ARC FLOOR LAMP USER GUIDE

Product Code:  
12000133  
12080103  
12080104

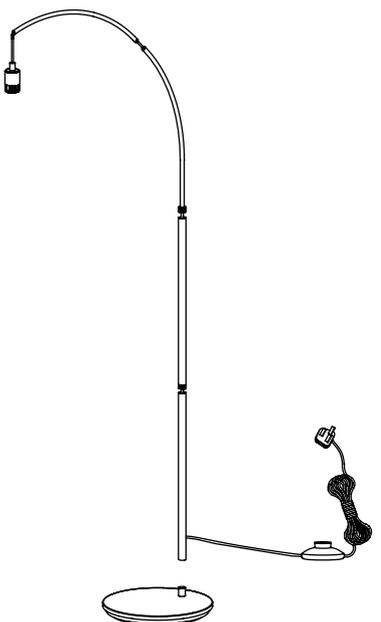

## Getting started

Thank you for purchasing this John Lewis & Partners product. For your safety, and to make sure everything is working properly, please read the instructions carefully before use.

## Warnings

This is a Class II product and must NOT be earthed. Please read these instructions carefully before commencing any work. Your lamp has been packaged as separate parts to prevent damage during transit. When manoeuvring or assembling this product, it must be lifted from the base. Do not pick up by the stems. The lamp must be protected by a 3 amp fuse in the mains plug. If you are in any doubt, please consult a qualified electrician. For your safety, always switch off the supply before cleaning or changing the bulb. If the mains cable becomes damaged it must only be replaced by a technically competent, qualified person. Always use correct type and wattage bulb. Never exceed the wattage stated.

## Parts list

Description	Image	Quantity
Light fitting (4 sections + base) and shade ring		x 1
Hex key		x 1
Grub screw		x 1
Spanner		x 1

## Product assembly

### Step 1

Carefully unpack the carton, making sure all the parts are present before assembly.

### Step 2

Attach tube (B) on to the top section (A) using the hex key provided. Secure in place with the grub screw (C).

### Step 3

Screw tube (D) on to tube (B) in a clockwise direction. Take care not to trap the cable or cross the threads. Then screw tube (E) on to tube (D) in the same way.

### Step 4

Gently pull any excess cable through from under the base (F). Turn the completed assembly anticlockwise approximately 6 times. (Turning the tubes anticlockwise first ensures that the cable will straighten when the tubes are fully assembled).

### Step 5

Push the assembly on to the base and using a small screwdriver, secure in place with the two small screws provided (G). Make sure the lampholder is facing forward over the base. If need be this can be adjusted by loosening the nut in the base with the spanner provided, adjusting the position and re tightening the nut.

### Step 6

Stand the product upright and check the tightness of the joints by hand. Make sure that the stem is facing forwards over the base of the lamp.

### Step 7

Remove the shade ring (H) from the threaded lampholder. Place your chosen shade over the lampholder and refit the shade ring. Secure in place.

### Step 8

Fit the recommended bulb (I) as per the details overleaf.

### Step 9

Unbundle the cable from the cable tie. Your floor lamp is now ready to use. Switch on using the floor switch.
