

Product information

- Indoor use only
- Non-dimmable
- Replacement bulbs should be the same type and rating, available from John Lewis Partners or other established brands
- Clean the fitting with a soft dry cloth. Do not use abrasive chemical cleaners as this will damage the finish

Aftercare and Troubleshooting

You've switched on the light, but it's not working:

1. Check your power supply is switched on
2. Turn off the light and check that the bulb is inserted correctly
3. Check the bulb is still in working order

If there are technical issues with this product that you can't solve, please contact your nearest John Lewis & Partners shop or call Technical Support on 03301 230106.

BEACON FLOOR LAMP USER GUIDE

Product Code:
12000227

Getting started

Thank you for purchasing this John Lewis & Partners product. For your safety, and to make sure everything is working properly, please read the instructions carefully before use.

Warnings

This is a Class II product and must NOT be earthed. Please read these instructions carefully before commencing any work. Your lamp has been packaged as separate parts to prevent damage during transit. When manoeuvring or assembling this product, it must be lifted from the base. Do not lift by the stem. The lamp must be protected by a 3 amp fuse in the mains plug. If you are in any doubt, please consult a qualified electrician. For your safety, always switch off the supply before cleaning or changing the bulb. If the mains cable becomes damaged it must only be replaced by a technically competent, qualified person. Always use correct type and wattage bulb. Never exceed the wattage stated.

Parts list

Description	Image	Quantity
Light fitting (3 sections + base)		x 1
Spanner		x 1
Base pad		x 1

Product assembly

Step 1

Carefully unpack the carton, making sure all the parts are present before assembly.

Step 2

Screw tube (B) onto the lampholder section (A) in a clockwise direction. Take care not to trap the cable or cross the threads. Then screw tube (C) on to tube (B) in the same way.

Step 3

Gently pull any excess cable through from under the base (D) and then out through the side of the base. Turn the completed assembly anticlockwise approximately 6 times. (Turning the tubes anticlockwise first ensures that the cable will straighten when the tubes are fully assembled).

Step 4

Screw the stem into the base. Rotate the stem carefully but firmly to make sure the head faces forward. Use the supplied spanner (E) to tighten the nut at the bottom of the base.

Step 5

Fit the base pad (F) to the base and stand the product upright. Check the tightness of the joints.

Step 6

Fit the recommended bulb (G) as per the details overleaf.

Step 7

Unbundle the cable from the cable tie. Your floor lamp is now ready to use. Switch on using the floor switch.

Note:

The position of the head can be adjusted to the appropriate angle as needed.
