# CLASSIC E27 PENDANT CORD

## USER GUIDE

5 YEARS

Product Code:  
 70380214  
 70380216  
 70380218

## Getting started

Thank you for purchasing this John Lewis & Partners product. For your safety, and to make sure everything is working properly, please read the instructions carefully before use.

## Warnings

This is a Class 1 product and must be earthed.

It is recommended that this fitting is installed by a qualified electrician.

Install in accordance with the IEE Wiring regulations and the Building Regulations.

To prevent electrocution switch off at mains supply before installing or maintaining this fitting. Ensure other persons cannot restore the electrical supply without your knowledge.

If you are in any doubt, please consult a qualified electrician.

This light fitting must be connected to a 5 amp fused circuit.

If replacing an existing fitting, make a note of the connections.

Always use the correct type and wattage bulb. Never exceed the wattage stated.

Dispose of used bulbs carefully.

This product is suitable for installation on surfaces with normal flammability e.g. wood, plasterboard, masonry. It is not suitable for use on highly flammable surfaces (e.g. polystyrene, textiles).

For your safety, always switch off the supply and allow the fitting to cool down before changing lightbulbs, cleaning, or adjusting the light's position.

When using with a shade of a different wattage rating, always follow the lower rating.

Weight of the supported pendant or shade must not exceed 2kg.

Ensure that this product has been fully assembled and the various component parts are fully tightened before use.

## Parts list

Description	Image	Quantity
Light fitting		x 1
Wall plugs		x 2
Screws		x 2

Note:

During transit, the cable can become kinked. It may be necessary to straighten the cable to allow the product to hang level. Manipulate the kinked cable between thumb and fingers to straighten.

## Product assembly

### Step 1

Carefully unpack the carton, making sure all the parts are present before assembly. Before removing the existing fitting, carefully note the position of each set of wires.

### Step 2

Remove the fixing bracket (A) from the product by unscrewing the two side screws (B) and retain for reuse. Ensure there is a solid mounting surface to support the weight of the light fitting. Using the fixing bracket as a template, mark the position of the mounting holes. Drill holes and fit supplied wall plugs (C) (suitable for masonry only).

Take care to avoid damaging any concealed wiring and pipes.

Fix the bracket to the ceiling using supplied screws (D).

### Step 3

The hanging height of this product can be adjusted.  
Work out the required height and feed the cable through the cord grip (E) until the desired height is achieved.

**Please note:** Do not loosen the screw clamp inside the ceiling cup, as this is securing the cable into the terminal block.

### Step 4

Having identified the household wiring from your existing light fitting, connect to the connection block (F) inside the product in the following way. Check that:

- You have correctly identified the house wires.
- The connections are tight.
- No loose strands have been left out of the connection block.

HOUSEHOLD SUPPLY

LIGHT FITTING

SWITCHED LIVE ————

BLUE (N)

GREEN/YELLOW  OR METALLIC EARTH CONNECTION

BROWN (L)

### Step 5

Re attach the product to the fixing bracket using the two screws removed in step 2 and tighten to secure. Take care not to trap any wiring.

### Step 6

A shade can be fitted if you wish but do not exceed weight limit of 2kg for the shade. There is no need to use a shade reducer ring with this product. If present, just remove from the centre of the gimbal. When installing a shade, be sure to only remove the lower shade ring (G).

### Step 7

Fit the recommended bulb (H) as per the details overleaf.  
Your light is now ready for use.
