Wall attached item only:

A guide to wall mounting and fixings

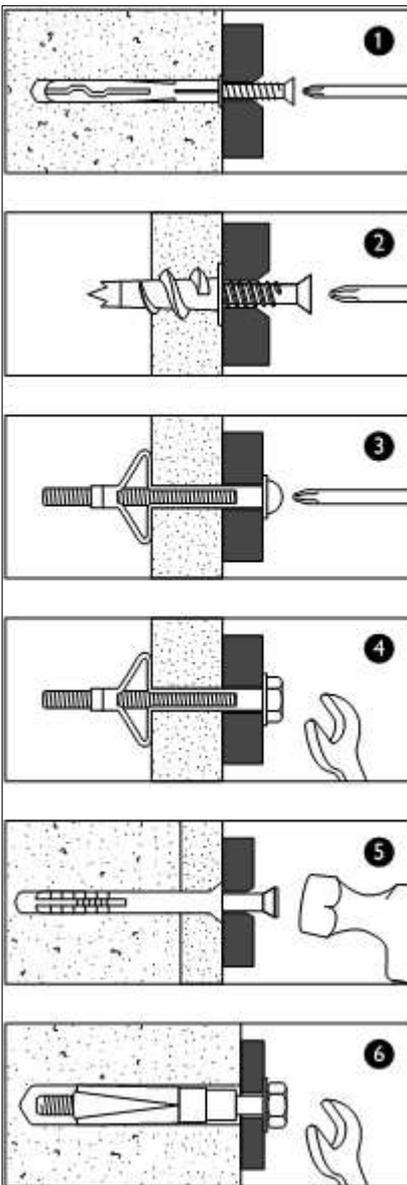

Warning

In order to prevent overturning this product must be used with the wall attachment device provided. Wall fixing screws are not included, since different wall materials require different types of screws / fixings. Please ensure you use the correct screws / fixings for your type of walls and seek professional advice if you are not sure.

Installation shall be carried out exactly according to the instructions provided – otherwise a safety risk can occur if incorrectly installed. Failure of the product due to incorrect fixings is the responsibility of the installer.

Important: When drilling into the walls always check that there are no hidden wires or pipes etc.

Types of walls

You can use one of the following types of wall plug if your walls are made of brick, breezeblock, concrete, stone or wood.

1. General Purpose wall plug

Generally aerated blocks should not be used to support heavy loads, use a specialist fitting in this case. For light loads, general - purpose wall plugs can be used.

2. Plasterboard wall plug

For use when attaching light loads on to plasterboard partitions.

3. Cavity Fixing wall plug

For use with plasterboard partitions or hollow wooden doors.

4. Cavity Fixing – Heavy Duty wall plug

For use when fitting or supporting heavy loads such as shelving, wall cabinets and coat racks.

5. Hammer Fixing wall plug

For use with walls stuck with plasterboard. The hammer fixing allows it to be fixed to the wall rather than the plasterboard. Always check the fixing is secure to the retaining wall.

6. Shield Anchor wall plug – Heavy loads

For use with heavier loads such as TV and Hi-Fi speakers and satellite dishes etc.

Care and maintenance

Safety: Periodically check all fittings and wall fixings to ensure they have not come loose and retighten as necessary.

Care guide

Care and maintenance

Painted furniture

The Anyday Format range combines two methods of painting: UV coating (ultraviolet) and PU (polyurethane) paint finish. The combination of these processes guarantees the best finishing on furniture. Some painted furniture may present a distinct smell. This is characteristic of new furniture and should fade within time.

How to care for your furniture

Protect your furniture from direct sunlight, it could change the color of your piece. To clean, use a clean, slightly damp cloth and then dry the surface. Do not use chemical or abrasive products for cleaning. Avoid sharp objects on the surface of furniture.

Make sure all surfaces are protected from heat and liquids by mats and coasters. Wipe up spills immediately and ensure that a mat or pad is placed under paper if you are writing.

Our furniture will endure most temperatures in the home, but it is best to avoid placing furniture next to heat sources such as radiators or fires. The lack of humidity caused by home heating can cause damage such as warping.

Safety instructions

Never drag furniture when moving it, always lift it.

Periodically check all fixings to ensure none have come loose and retighten when necessary.

Please take care when handling or moving the furniture as careless handling may cause damage or injury.

Furniture can be dangerous if incorrectly installed. Assembly should be carried out by a competent person. No liability will be accepted for damage or injury caused by incorrectly installed or assembled furniture.

Retain these instructions for future reference.

Your feedback is important to us and we would love to hear your comments on your new furniture. Please visit our website to leave a review. Thank you.
