

Product information

- Indoor use only
- 4 stage CCT
- Clean the fitting with a soft dry cloth. Do not use abrasive chemical cleaners as this will damage the finish
- This product contains a Li-ion battery

Aftercare and Troubleshooting

Please note the touch sensor will use a small amount of current at all times and will slowly drain the battery even when the light is off.

If you find the light turning itself off, even when the product is put on charge, it means the battery has been almost completely drained and needs initial charging before the light can be switched on again. Please refer to Step 3.

If there are technical issues with this product that you are unable to resolve, please contact your nearest John Lewis & Partners shop or call Technical Support on 03301 230106.

Specification

Max power: 1.5W LED
RGB 100Lm
INPUT Max.: 5W DC 5V 1A
Battery: 3.7V 1200mAh
IP rating: 20
Weight: 0.16kg
Charging time: 3.5-4 hours when fully discharged
6 hours (approx.) in normal use
Direct current 

Replaceable light source by a professional

This product contains a light source of energy efficiency class G.

Getting started

Thank you for purchasing this John Lewis & Partners product. For your safety, and to make sure everything is working properly, please read the instructions carefully before use.

Warnings

This product is battery powered and the internal battery is recharged via a supplied USB-A to USB-C cable.

This product should only be connected to equipment of Class II or class III.

Batteries are only to be charged by persons over 8 years of age.

Only charge via a input max. 5W DC 5V 1A SELV plug-in adapter (phone charger or similar USB outlet).

Do not operate in moist or humid conditions.

Do not plug this product directly into the mains or by other means other than the supplied cable.

Provide adult supervision in use.

Take care not to drop the product.

Do not let this product come into contact with heat.

This product is not suitable for children under 3 years of age.

The battery must not be opened, destroyed or incinerated.

Before each use, inspect the product. Stop using at the first sign of damage or weakness, as broken parts could present a choking hazard.

Regularly check for broken or damaged parts. If damage is found, stop using as broken parts could present a choking hazard.

Instructions for Disposal (End-of-Life Management): This product contains a lithium battery which must be disposed of separately from household waste at the end of its life. To protect the environment and human health, please ensure proper disposal of this battery and the product.

Information for Recyclers: To ensure safe and efficient recycling, the battery should be removed by trained professionals in accordance with local regulations and industry best practices for lithium battery recycling.

John Lewis & Partners are committed to responsible sourcing of raw materials used in our products, including lithium batteries. We adhere to robust due diligence policies to prevent and mitigate social and environmental risks throughout our supply chain, in accordance with Regulation (EU) 2023/1542.

Parts list

Description	Image	Quantity
Light fitting Please note: Only 1 product is supplied		x 1
USB cable		x 1

Product assembly

Step 1

Carefully unpack the carton, making sure all the parts are present before assembly.

Step 2

Connect the USB cable to the product (A) and to a USB outlet (phone charger or similar USB outlet rated input max. 5W DC 5V 1A).

Step 3

Charge the battery, which is already fitted to the product before first use. Ensure the product is fully charged before operating. The light indicator (B) will turn from red to green when fully charged. Your light is now ready for use. Place on a flat, stable surface and treat it with care as it is not a toy.

Note:

This product is fitted with a thermal cut-out to prevent over-heating (+35°C) when charging. This is a safety feature. When re-charging in warm environments, the charge indicator light may frequently change from red to green and back to red. This is normal and indicates that the thermal cut-out is operating. If this occurs, we recommend moving the product to a cooler location for more effective charging.

To operate the light, press the power button (B). The product lights up in warm white colour. To change the colour, tap the top.

One tap - red, second - green, third - blue.

On the forth tap the light will change to purple and rotate the colour changing cycle automatically.

Tap again to swich off. (Note that the sensor will still be active unless the power button is pressed).

The light will start to dim after 6 hours of use. Top up the battery by charging the light until the light turns green (approx. 3.5-4 hours).

Always unplug after charging. Do not use while charging to extend battery life.
