

Product information

- Indoor use only
- Dimmable - When used with dimmable bulbs
- Replacement bulbs should be the same type and rating, available from John Lewis Partners or other established brands
- Clean the fitting with a soft dry cloth. Do not use abrasive chemical cleaners as this will damage the finish

Aftercare and Troubleshooting

You've switched on the light, but it's not working:

1. Check your power supply is switched on
2. Turn off the light and check that the bulb is inserted correctly
3. Check the bulb is still in working order

If there are technical issues with this product that you can't solve, please contact your nearest John Lewis & Partners shop or call Technical Support on 03301 230106.

Getting started

Thank you for purchasing this John Lewis & Partners product. For your safety, and to make sure everything is working properly, please read the instructions carefully before use.

Warnings

This is a Class 1 product and must be earthed. It is recommended that this fitting is installed by a qualified electrician. Install in accordance with the IEE Wiring regulations and the Building Regulations. To prevent electrocution switch off at mains supply before installing or maintaining this fitting. Ensure other persons cannot restore the electrical supply without your knowledge. If you are in any doubt, please consult a qualified electrician. This light fitting should be connected to a 5 Amp fused circuit. If replacing an existing fitting, make a note of the connections. Always use the correct type and wattage bulb. Never exceed the wattage stated. Dispose of used bulbs carefully. This product is suitable for installation on surfaces with normal flammability e.g. wood, plasterboard, masonry. It is not suitable for use on highly flammable surfaces (e.g. polystyrene, textiles). Never put anything on the product or hang anything on any part of this product. For your safety, always switch off the supply and allow the fitting to cool down before changing the lightbulb, cleaning or removing the shade. When using with a shade of a different wattage rating, always follow the lower rating.

Parts list

Description	Image	Quantity
Light fitting with x 1 shade ring (fitted to lampholder)		x 1
Wall plugs		x 2
Screws		x 2

Product assembly

Step 1

Carefully unpack the carton, making sure all the parts are present before assembly. Before removing the existing fitting, carefully note the position of each set of wires. Installation of this product maybe easier with the help of an assistant.

Step 2

Ensure there is a solid mounting surface to support the weight of the light fitting. Make a hole in the wall large enough for the connection block (A) to fit inside and using the wall back (B) as a template, mark the position of the mounting holes. Drill holes and fit supplied wall plugs (C) (suitable for masonry only). Take care to avoid damaging any concealed wiring and pipes.

Step 3

Having identified the household wiring from your existing light fitting, connect to the connection block inside the product in the following way. Check that:

- You have correctly identified the house wires.
- The connections are tight.
- No loose strands have been left out of the connection block.
- Make sure the lid of the connection box is securely closed.
- The connection box is housed in a recess inside the wall.

Step 4

Fix the product to the wall using the supplied screws (D). Take care not to trap any wiring. **Note:** This product can be fitted with the lampholder facing upwards or downwards. If used in an upwards position, this product can accommodate a candle clip shade.

Step 5

Fit the shade (E) (not supplied). First remove the shade ring (F) from the threaded lampholder. Place the shade over the lampholder and refit the shade ring to secure in place. When installing the shade, be sure to only remove the first shade ring.

Note: As the lampholder is a standard bayonet (B22/BC), the shade reducer ring may need to be fitted to reduce the shade hole size.

Step 6

Fit the recommended bulb (G) as per the details overleaf.

Replace fuse or circuit breaker and switch on. Your light is now ready for use.
