

## Product information

- Indoor use only
- Dimmable - When used with dimmable bulbs
- Replacement bulbs should be the same type and rating, available from John Lewis Partners or other established brands
- Clean the fitting with a soft dry cloth. Do not use abrasive chemical cleaners as this will damage the finish

## Aftercare and Troubleshooting

### You've switched on the light, but it's not working:

1. Check your power supply is switched on
2. Turn off the light and check that the bulb is inserted correctly
3. Check the bulb is still in working order

If there are technical issues with this product that you can't solve, please contact your nearest John Lewis & Partners shop or call Technical Support on 03301 230106.

Please retain these instructions for future reference.

Product Code:  
70259551

**Getting started**

Thank you for purchasing this John Lewis & Partners product. For your safety, and to make sure everything is working properly, please read the instructions carefully before use.

**Warnings**

This is a Class 1 product and must be earthed. It is recommended that this fitting is installed by a qualified electrician. Install in accordance with the IEE Wiring regulations and the Building Regulations. To prevent electrocution switch off at mains supply before installing or maintaining this fitting. Ensure other persons cannot restore the electrical supply without your knowledge. If you are in any doubt, please consult a qualified electrician. This light fitting should be connected to a 5 Amp fused circuit. If replacing an existing fitting, make a note of the connections. Always use the correct type and wattage bulb. Never exceed the wattage stated. Dispose of used bulbs carefully. This product is suitable for installation on surfaces with normal flammability e.g. wood, plasterboard, masonry. It is not suitable for use on highly flammable surfaces (e.g. polystyrene, textiles). Never put anything on the product or hang anything on any part of this product. For your safety, always switch off the supply and allow the fitting to cool down before changing lightbulbs, cleaning or removing shades. When using with a shade of a different wattage rating, always follow the lower rating.

Description	Image	Quantity
Light fitting with x 2 shade rings (fitted to lampholders)		x 1
Wall plugs		x 2
Screws		x 2

**Product assembly**

**Step 1**

Refer to assembly diagrams right. Carefully unpack the carton, making sure all the parts are present before assembly. Before removing the existing fitting, carefully note the position of each set of wires.

**Step 2**

Remove the fixing bracket (A) from the product by unscrewing the two finials (B) and retain for reuse. Ensure there is a solid mounting surface to support the weight of the light fitting. Using the fixing bracket as a template, mark the position of the mounting holes. Drill holes and fit supplied wall plugs (C) (suitable for masonry only). Take care to avoid damaging any concealed wiring and pipes. Fix the bracket to the wall using supplied screws (D).

**Step 3**

Having identified the household wiring from your existing light fitting, connect to the connection block (E) inside the product in the following way. Check that: You have correctly identified the house wires. The connections are tight. No loose strands have been left out of the connection block.

HOUSEHOLD SUPPLY	LIGHT FITTING
NEUTRAL	BLUE (N)
EARTH	GREEN/YELLOW (⊕) OR METALLIC EARTH CONNECTION
SWITCHED LIVE	BROWN (L)

**Step 4**

Re attach to the fixing bracket using the two finials removed in step 2 and tighten to secure. Take care not to trap any wiring.

**Note:** This product can be fitted with the lampholders facing upwards or downwards. If used in an upwards position, this product can accommodate candle clip shades.

**Step 5**

Fit the shades (F) (not supplied). First remove the shade rings (G) from the threaded lampholders. Place the shades over the lampholders and refit the shade rings to secure in place. When installing the shades, be sure to only remove the first shade ring.

**Note:** As the lampholders are a standard bayonet (B22/BC), the shade reducer rings may need to be fitted to reduce the shade hole size.

**Step 6**

Fit the recommended bulbs (H) as per the details overleaf.

Replace fuse or circuit breaker and switch on. Your light is now ready for use.
