

Caring for your product

We recommend cleaning with a soft dry cloth. Do not use abrasive materials as these will damage the finish.

Replace bulbs from John Lewis or established brand of the same type and compatibility.

Aftercare and Troubleshooting

Please ensure all screws and small pieces are properly tightened to the product.

When changing a bulb, always switch off the mains and allow the bulb to cool down before handling.

A bulb's watt rating indicates how much energy it uses. The higher the watt, the more energy it requires. Lumens is a measure of brightness. The higher the number of lumens, the brighter the light.

Specification

Max. power: 30W
Voltage: 220–240V~50Hz
IP rating: 20
Weight: 14 kg

K Wrench		1PC
L Shade		3PCS
M Socket rings		3PCS
N Socket holder		3PCS

Recommended bulb

3 × 10 watt E27 LED bulbs
Bulbs replaceable
Bulbs not included

Product assembly

NOTE: When assembling, keep in mind that this arc lamp should face forward with the cord coming out of the back of the base. The screw hole of tube (B) should face towards the back of the lamp in the same direction as the cord coming out of the back of the base.

1. Carefully unpack the carton, making sure all parts are included before assembly. Place lamp parts on a flat surface when assembling.
2. Place tube (A) onto tube (B) and screw to tighten.

3. Insert tube (C), (D) and (E) into tube (B). Then, turn part (D) on each tube until tight to connect the arms. To easily assemble each joint together, make sure to slightly lift up the arm to relieve the pressure. This will allow for the joints to easily screw together.

4. Insert pole (A) into washer (G) and base (H). Tighten nut (J) to washer (I) and base (H) using wrench (K).

5. Place shades (L) onto socket holders (N). Screw socket rings (M) on until tight to secure shade.

NOTE: The Arc lamp should face forward with the cord coming out of the back of the base and you may need to pull any excess cord through the pole to base.
