# SALSA INTEGRATED LED **OUTDOOR LIGHT**

**USFR GUIDF** 

Thank you for purchasing this Salsa integrated LED outdoor light. Please read the instructions carefully before use to ensure safe and satisfactory operations of this product.

## Charging and Operation

Before using the light set for the first time, we would recommend you charge the product for 2 full days (turning off at dusk).

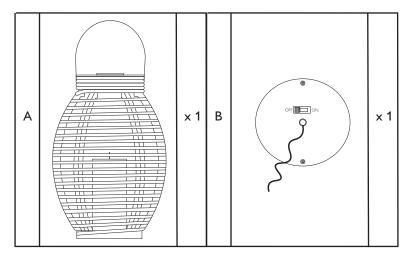

#### Warnings

When not in use or weather is not favourable, remove and store indoors in a dry location. Keep out of the reach of children and pets.

Do not attempt to connect the light set electrically to any other light set or power source. Do not attempt to replace the product battery.

This symbol indicates that batteries should not be disposed of in the normal household waste, but taken to appropriate local recycling facilities, where and when these are available. Never throw batteries in a fire or attempt to open the outer casing.

#### Parts List

#### Care instructions

We recommend cleaning with a soft, dry cloth. Do not use abrasive materials, as these will damage the finish.

#### Assembly

Please ensure you remove all packaging from the product before positioning outside. Peel off the protective film that is covering the solar panel.

- 1. Unscrew the lid "B" of the lantern where the solar panel is located. On the underside of the lid, you will find the power switch and battery housing. As per our recommendations, the lantern will need charging before it can be used.
- 2. Push the switch to the side that says 'ON' for continuous use.
- **3.** Re-screw the lid "B" of the lantern, ensuring the solar panel is facing out. Now, position the lantern in the recommended position.

Position the lantern in direct sunlight and where it will be exposed for the longest time. Do not position the lantern where there are shadows from buildings, trees or other foliage, as this will reduce the charging performance.

Full charge will last up to 6-8 hours per day.
