### Step 11

Parts, fittings & tools

Screw the bracket to the wardrobe using the pre-drilled hole with screw provided

### Step 12

Parts, fittings & tools

Ready to use

Wall attached item only:

## A guide to wall mounting and fixings

### Warning

Wall fixing screws are not included, since different wall materials require different type of screws / fixings. Please insure you use the correct screws / fixings for your type of walls and seek professional advice if you are not sure.

Failure of the product due to incorrect fixings is the responsibility of the installer.

Important: When drilling into the walls always check that there are no hidden wires or pipes etc.

### Types of walls

You can use one of the following types of wall plug if your walls are made of brick, breezeblock, concrete, stone or wood.

### 1. General Purpose wall plug

Generally aerated blocks should not be used to support heavy loads, use a specialist fitting in this case. For light loads, general purpose wall plugs can be used.

### 2. Plasterboard wall plug

For use when attaching light loads on to plasterboard partitions.

### 4. Cavity fixing - heavy duty wall plug

For use when fitting or supporting heavy loads such as shelving, wall cabinets and coat racks.

### 5. Hammer fixing wall plug

For use with wall stuck with plasterboard. The hammer fixing allows it to be fixed to the wall rather than the plasterboard. Always check the fixing is secure to the retaining wall.

### 6. Shield Anchor wall plug-Heavy loads

For use with heavier loads such as TV and Hi-Fi speakers and satellite dishes etc.

### Care and maintenance

Safety: Periodically check all fittings and wall fixings to ensure they have not come loose and retighten as necessary.

## Care guide

### Care and maintenance

#### Wood furniture

Wood displays different grain patterns depending on which way it is cut – for example, the ‘medullary ray’ which can appear on oak furniture is a mark of good quality timber – these are just characteristics of the natural beauty of the wood. Some furniture is also deliberately aged and rustic.

Wood veneers also allows a distinctive pattern to be created on some surfaces, such as tabletops and drawer fronts by the way slivers are arranged.

All timber and veneer surfaces will change colour and mellow over time. New furniture will initially vary in shade from items that have been previously purchased.

#### How to care for your wood furniture

Furniture with a hard lacquer, wax polish or painted surface should be dusted with a dry cloth.

Spray polishes are best avoided as they contain silicones which may spoil the furniture’s surface when building up over time.

Make sure all surfaces are protected from heat and liquids by mats and coasters. Wipe up spills immediately and ensure that a mat or pad is placed under paper if you are writing.

Our furniture will endure most temperatures in the home, but it is best to avoid placing furniture next to heat sources such as radiators or fires. Be particularly careful with solid wood as the lack of humidity caused by home heating can cause damage such as warping.

#### Safety instructions

Never drag furniture when moving it, always lift it.

Periodically check all fixings to ensure none have come loose and retighten when necessary.

Please take care when handling or moving the furniture as careless handling may cause damage or injury.

Furniture can be dangerous if incorrectly installed. Assembly should be carried out by a competent person.

No liability will be accepted for damage or injury caused by incorrectly installed or assembled furniture.

Do not place weight too close edge of the table and do not lean on it .

Retain these instructions for future reference.
