Getting started

Thank you for purchasing this John Lewis & Partners product. For your safety, and to make sure everything is working properly, please read the instructions carefully before use.

Warnings

This is a Class II product and must NOT be earthed.
It is recommended that this fitting is installed by a qualified electrician.
Install in accordance with the IEE Wiring regulations and the Building Regulations.
To prevent electric shock switch off at mains supply before installing or maintaining this fitting. Ensure other persons cannot restore the electrical supply without your knowledge.
If you are in any doubt, please consult a qualified electrician.
This light fitting should be connected to a 5 Amp fused circuit.
If replacing an existing fitting, make a note of the connections.
This product is rated IP44 and must not be used without the shade attached.
This product is suitable for installation on surfaces with normal flammability e.g. wood, plasterboard, masonry. It is not suitable for use on highly flammable surfaces (e.g. polystyrene, textiles).
For your safety, always switch off the supply before cleaning or removing the shade.

Parts list

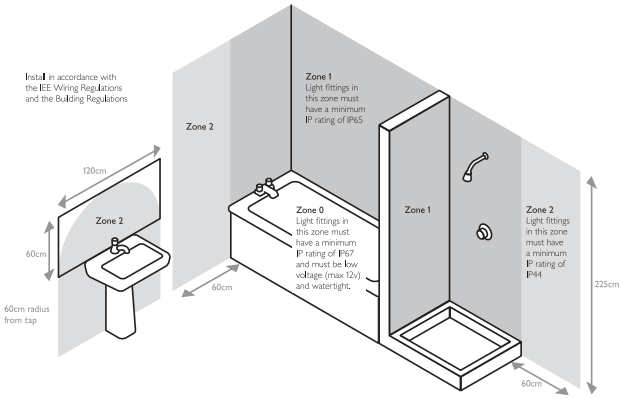

Description	Image	Quantity
Light fitting		x 1
Wall plugs		x 3
Screws		x 3
Washers		x 3

Assembly

Refer to assembly drawing opposite.
Carefully unpack the carton, making sure all the parts are present before assembly.

This product has special protection against the ingress of moisture and is IP44 rated.

This product is suitable for use in Zone 2, and outside Zones of a bathroom.
See diagram. **If installing in a bathroom a 30mA RCD must be used - in accordance with IEE Wiring Regulations and the Building Regulations.**

Product assembly

Step 1
Decide on the position of the light fitting or remove existing light fitting. Note the position of the electrical connections, and ensure there is a solid mounting surface, preferably a wooden joist or joist bridge, to support the weight of the light fitting.

Step 2
Separate the shade (A) from the ceiling cover (B) by twisting anticlockwise. Use the ceiling cover as a template to mark the screw holes. Taking care to avoid damaging concealed wires and pipes, drill holes and fit supplied wall plugs (C) (suitable for masonry only - for other surfaces use appropriate fixings).

Step 3
Pierce a hole in the rubber grommet (D) fitted in the ceiling cover and pull the household wiring through.

Step 4
Secure the fitting to the ceiling by using the supplied screws and rubber washers (E).
Take care not to trap any wiring.

Step 5
Having identified the household wiring from your existing light fitting, connect the house wiring to the connection block - see wiring diagram (F).
Connect Live cable to terminal marked 'L' and Neutral cable to terminal marked 'N'.
NOTE: This is a Class II fitting and must NOT be connected to earth. Check that...

You have correctly identified the house wires.
The connections are tight.
No loose strands have been left out of the connection block.

Step 6
Refit the shade and twist clockwise to secure. Ensure the rubber seal around the glass shade is in place.

Step 7
Turn on the power and test
