

Caring for your product

We recommend cleaning with a soft dry cloth. Do not use abrasive materials as these will damage the finish.

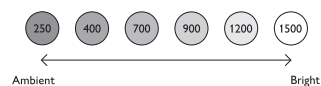

Replace bulbs from John Lewis or established brand of the same type and compatibility.

Aftercare and Troubleshooting

Please ensure all screws and small pieces are properly tightened to the product.

When changing a bulb, always switch off the mains and allow the bulb to cool down before handling.

A bulb's watt rating indicates how much energy it uses. The higher the watt, the more energy it requires. Lumens is a measure of brightness. The higher the number of lumens, the brighter the light.

Specification

Recommended bulb

3 × 10 watt E27 LED bulbs

Bulbs replaceable

Bulbs not included

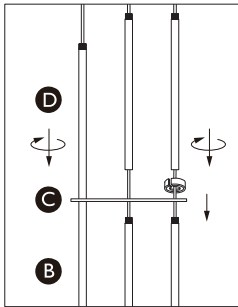

Product assembly

1. Carefully unpack the carton, making sure all parts are included before assembly. Place lamp parts on a flat surface.

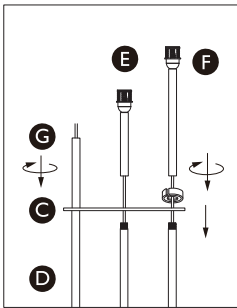

2. Please remove black bushings from the threading of the poles.

3. Screw 3 tubes (B) clockwise into base (A) until tight.

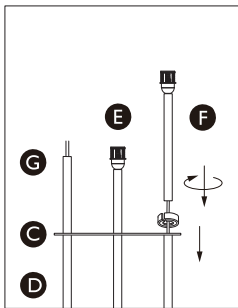

4. Insert acrylic table (C) onto tubes (B). Hold in place, then screw tubes (D) into tubes (B) until tight.

Note: Please ensure that you remove the protective film from both sides of each acrylic table (C) after assembly. Please also make sure the cable is pulled through acrylic table (C) before screwing tubes (D) and (B) together.

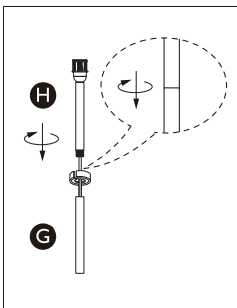

5. Insert acrylic table (C) onto tubes (D).

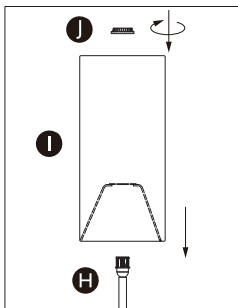

6. In order to screw on tube (E), (F) and (G), you need to alleviate the excess cord. You will need to lay down the lamp on its side to reach the bottom of the lamp. Pull each black cord gently from the bottom of the base through the poles. Note, you can hide the excess cord under the black plastic in the base.

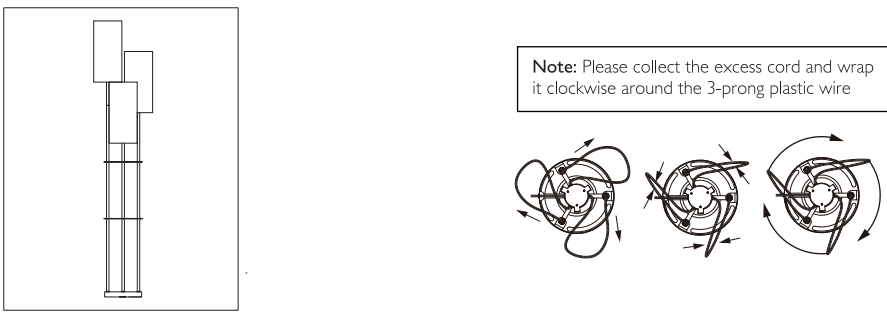

7. Screw on tube (E), (F) and (G) to secure acrylic table (C).

8. Screw tube (H) into tube (G) to until tight.

9. Remove socket rings (J) from all 3 sockets. Place 3 shades (I) onto sockets and then screw on socket rings (J) to secure shades.

Note: Please collect the excess cord and wrap it clockwise around the 3-prong plastic wire
