ANYDAY JOHN LEWIS & PARTNERS

Double Head 2 Light Floor Lamp User Guide

Getting started

Thank you for purchasing this John Lewis & Partners product. For your safety, and to make sure everything is working properly, please read the instructions carefully before use.

Warnings

This is a Class II product and must NOT be earthed.

Please read these instructions carefully before commencing any work.

Your lamp has been packaged as separate parts to prevent damage during transit. When manoeuvring or assembling this product, it must be lifted from the bottom section.

The lamp must be protected by a 3 amp fuse in the mains plug.

If you are in any doubt, please consult a qualified electrician.

For your safety, always switch off the supply before cleaning or changing the bulb.

If the mains cable becomes damaged it must only be replaced by a technically competent, qualified person.

Always use correct type and wattage bulb. Never exceed the wattage stated.

Parts list

Description	Image	Quantity
Light fitting (3 sections + base)		x 1
Spanner		x 1

Product assembly

Step 1

Carefully unpack the carton, making sure all the parts are present before assembly.
Remove protective plastic end-caps from the tubes (1).

Screw tube (B) onto tube (A) in a clockwise direction.
Take care not to trap the cable or cross the thread.
Then screw tube (C) on to tube (B) in the same way.

Gently pull any excess cable through from under the base (D) and then out through the side of the base.
Turn the completed assembly anticlockwise approximately 6 times (Turning the tubes anticlockwise first ensures that the cable will straighten when the tubes are fully assembled).
Screw the assembly in a clockwise direction on to the base.

Secure at the bottom of the base using the spanner (E).
Take care not to trap the cable or cross the threads, firmly tighten the tube by hand.

Fit the bulb (F). **Do not exceed the recommended rated power as this may cause damage to the light fitting.**

Unbundle the cable from the cable tie. Your floor lamp is now ready to use. Switch on using the floor switch.

NOTE: The angle of the shades can be adjusted to the appropriate angle as needed.

The head may become hot during use. Always switch off and allow to cool before adjusting the lamphead.
