*Each of these worksurfaces are unique, reflecting the natural appeal of marble and stone.

Whilst **minerva** sink modules are made from a solid piece of material, the recessed sections may have a slightly different pattern on some décors due to the spread of the coloured chips. Due to the nature of the particulate used in producing **minerva** Copper Fleck solid worksurfaces, it is possible that some slight unevenness may be felt in the finished surface. This added texture is quite normal and does not affect the use of the worktop.

minerva[®] Important additional information

- Our veined decors reflect the natural appeal of stone. Whilst each joint is seamless and hygienic, there may be a visual difference when two worksurfaces are joined as the veining on each worksurface is unique.
- Some décors have random veining that has a directional nature along the length of the sheet. The random directional veining ranges from subtle to bold. The veining pattern and the overall shade may change through the thickness of the product. Therefore whilst joints remain seamless, they may be more visible
- In the Calcutta White décor, the pattern on the large sheet that each top is made from is fundamentally the same – however as each worktop and breakfast bar is cut from that sheet, the position of the veining will differ from one product to the next. It is not practical to try and align the veining when joining two surfaces together.
- Whilst minerva sink modules are made from a solid piece of material, the recessed sections may have a slightly different pattern on some decors due to the spread of colour chips.
- Due to the nature of the particulates used in producing minerva Copper Fleck solid worksurfaces, it is possible that some slight unevenness may be felt in the finished surface. This is quite normal and does not affect the use of the worktop.
- **Only our steel and granite bowls are suitable for use with instant hot water taps. Allowing instant hot water to run freely into acrylic bowls over a period of time may result in superficial crazing.**

minerva[®] delivery pointers

CARYSIL

Things to consider:

Please send a fully completed Direct Delivery factsheet with your purchase order.

Please send photos of any restricted access areas and stair ways.

If delivery is above ground floor, then please consider size and weight restrictions of the worktops. (3 metre length weighs 90 kilos). Consider when planning using the shorter 2.4 m lengths if the design allows.

If a large Island is included in the design, then be aware the installers will need to be onsite to help with lifting. Please let us know installation week for the delivery.

minerva[®] delivery

Products ordered are delivered to the customer's home address by Carysil's home delivery team.

You specify the week that the delivery will be required which we will acknowledge back to you.

The customer will receive confirmation via email of exact delivery day at least 1 week in advance, followed by a further email from the home delivery team to advise of a 2 hour time slot. Customers must respond to both emails.

Further confirmation will be made by the home delivery team driver 30 minutes in advance on the day of delivery by phone call to customer.
